

Comedian Bill Murray once said that the best way to teach your kids about taxes is by eating 30% of their ice cream. While I wish taxes was that easy to explain, the reality is that the tax code has over 4.1 million words in it. That's five times longer than the King James Bible, that's seven times longer than Warren Peace, and that's four times longer than the entire Harry Potter series. Understanding and more importantly strategizing how taxes work with investing is critical to long term growth. In fact, ignoring this could prevent you from even achieving your goals.

So if this is a conversation that you think might be helpful by all means give us a call and we'll be sure to get you back on track. All the best.
